Multiple Sclerosis Rehabilitation An Issue

Multiple sclerosis: A special issue in the Annals of Physical and Rehabilitation Medicine

SI: Multiple sclerosis - ScienceDirect

An important aspect of multiple sclerosis rehabilitation is the preservation of physical functioning. Hot topics in the rehabilitation of physical function include (1) exercise therapy, (2) robot-assisted training and (3) pharmacological interventions. Exercise therapy has for many years been a controversial issue in multiple sclerosis rehabilitation and the advice generally given to patients was not to participate in physical exercise, since it was thought to lead to a worsening of symptoms ...

Rehabilitation and Multiple Sclerosis: Hot Topics in the ...

Rehabilitation, which includes psychotherapy and symptomatic therapy, is regarded nowadays as the best form of treatment for multiple sclerosis. An indepth diagnostic assessment of functional status and prognosis should be carried out before the start of the rehabilitation process.

Refers to a range of high-level brain functions affected in more than 50% of people with MS, including the ability to process incoming information, learn and remember new information, organize and problem-solve, focus attention and accurately perceive the environment.

Cognitive Changes | National Multiple Sclerosis Society

Multiple sclerosis (MS) is a potentially disabling disease of the brain and spinal cord (central nervous system). In MS, the immune system attacks the protective sheath (myelin) that covers nerve fibers and causes communication problems between your brain and the rest of your body. Eventually, the disease can cause permanent damage or deterioration of the nerves.
